-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claim 12 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Election was made **without** traverse in the reply filed on 10-26-05.

2. Claims 9-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 – line 4, “the ends” lacks clear antecedent basis, and “the” could be deleted from the term to clarify the claim in this regard as best understood. Additionally, “the slope” lacks clear antecedent basis.

Claim 10, “the deck” in line 2 lacks clear antecedent basis and could be written as –the first deck—for clarity as best understood.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 9-10, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Zaerr et al '537.

Art Unit: 3612

Zaerr et al teaches a vehicle carrying railcar assemblies defining vertically movable/pivoting upper deck ends 150+ (see figure 3). The upper deck ends are pivoted up to facilitate loading of cars on lower decks. The reference further teaches lowering the ends of the upper decks to align with adjacent upper decks of adjacent railcars and attaching bridge plates to the upper deck ends to facilitate movement of cars from one upper deck to an adjacent upper deck during loading/unloading.

Regarding claim 1, to the extent that at least during unloading, the upper deck 104 pivoting end 150 would be lowered adjacent a trailing car upper deck, the references teaches reducing the difference between elevations as broadly claimed. The slope of the bridge plate attached between decks would be reduced during movement of vehicles from one upper deck to another as broadly claimed and as best understood.

Claim 10, elements 160,152+ make up a pivoting assembly for the deck end portion.

This pivoting assembly is operated to pivot the deck from an upper generally horizontal position to a lower position as broadly claimed and as best understood.

5. Claim 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
